

# Wilcox Medical Center 5-11 Year Old Vaccine Clinic

healthier

Wilcox Medical Center is administering the Pfizer vaccine for ages 5-11.

Each person receiving a vaccine needs their own appointment.

Appointments need to be scheduled under the patient's name (not the parent or guardian's name).

If you wish to schedule several appointments, you may not be able to get the same appointment times, however if you all have appointments and come together, we will make every effort to accommodate your group. This may cause a delay from your scheduled time.

All minors ages 5 to 11 years old must be accompanied to their appointment by a parent or guardian. The parent or guardian who makes the appointment grants permission for the vaccine to be given.
