Neonatal Resuscitation Program (NRP)

The American Academy of Pediatrics/American Heart Association Neonatal Resuscitation Program course is based on new scientific evidence from the 2010 AHA Guidelines for CPR and ECC.

Course Description

This course has been designed to teach an evidence-based approach to resuscitation of the newborn. The causes, prevention, and management of mild to severe neonatal asphyxia are carefully explained so that health professionals may develop optimal knowledge and skill in resuscitation.

The Neonatal Resuscitation Program is an educational program that introduces the concepts and basic skills of neonatal resuscitation. Completion of the program does not imply that an individual has the competence to perform neonatal resuscitation. Each hospital is responsible for determining the level of competence and qualifications required for someone to assume clinical responsibility for neonatal resuscitation.

Course Pre-requisites

The Textbook of Neonatal Resuscitation, 6th Edition, which includes an interactive multi-media DVD-ROM, forms the basic educational component of NRP. This textbook is available for purchase from the AAP Online Bookstore. You will need to obtain and study this textbook prior to class. Take and pass all 9 lessons of the Neonatal Resuscitation Program online examination, during the 30 days before the scheduled class date. To access the online examination, navigate to the website http://www.healthstream.com/hlc/AAP and follow the directions in Section II to access the test. You must bring a copy of the online examination verification certificate with you to class. No admittance without the certificate of completion.
Location
Kapi‘olani Medical Center for Women & Children
1319 Punahou Street
Suite 828
Parking will not be validated.
